

Microsoft Business Solutions

Business Portal

Unlock business potential and enhance productivity by providing user-specific access to information and processes from a single Web-based portal. Built on Microsoft .NET technologies, Microsoft Business Solutions Business Portal integrates seamlessly with Microsoft Business Solutions–Solomon® to deliver applications, information, and processes to employees, customers, and partners across the enterprise.

Unlock the Potential of All Your Employees

Accelerate productivity across your business by providing employees with immediate access to business applications and to updated, accurate information so they can make better decisions faster.

Web-enabled Project Management

Deliver project financial status, task assignments, billings, invoices, timesheets, expense reports, and other documents through a Web browser, reducing the time required to manage these processes and eliminating paperwork and data re-entry.

Reduce Information Support Costs

By opening the flow of useful business information to your employees, you can reduce the endless stream of requests for custom reports and the countless calls for simple business facts. Free your IT, accounting, and support resources to help drive your business forward.

Help Deliver "At-a-Glance" Access to Key Performance Indicators

With Key Performance Indicators for Microsoft Business Portal, decision makers can stay informed about key business measurements, and use graphs, charts, and tables to communicate business information.

Expand the Uses for Your Portal

Provide access to information stored in other systems and Web-delivered applications, and use the role-based framework to deliver the right information to the right people.

Begin Benefiting Right Away

Works out of the box with Microsoft Solomon to deliver access to data, inventory queries, purchasing reports, and other information as soon as you assign access rights to your users.

Microsoft Business Portal Features List

Increase Availability of Information Throughout Your Business

- Publish sales reports, outstanding purchase orders, and budget reports online.
- Run queries to access detailed information on customers, vendors, inventory items, sales, and purchases. Modify and export queries to Microsoft Excel for further analysis or to share with others.
- Define and deliver access to personalized views of key business information using Key Performance Indicators for Microsoft Business Portal.
- Deliver role-based information to salespeople, purchasing agents, budget managers, customers, and any other role you create.

Enable Employees to Complete Common Tasks More Efficiently

- Help deliver access to Web-based applications such as time and expense entry, and requisitions.
- Workflow management improves efficiency for routine processes such as timecard and expense report approval.

Help Deliver Web-browser Access to Business Applications

- Access Microsoft Solomon windows via Microsoft Windows® Terminal Server.
- Create links to commonly used windows, so users can easily access the windows they use most often to do their jobs.

Tailor Microsoft Business Portal to Your Business

- Identify which tasks and information you wish to share by role.
- Add reports, queries, and tasks to each role-based page.
- Add access to external data sources and Web-delivered applications.

- Enable users to add Web parts such as stock tickers, travel updates, and weather reports to their pages.
- Customize the site with your company logo and colors.

Draws Data From Microsoft Business Solutions Applications

- Browser-based delivery eliminates the need to load and update applications on each desktop computer.
- Help deliver out-of-the-box access to Microsoft Solomon data and processes, helping to reduce the number of "ad hoc" reporting requests.
- Rapid user setup allows for mass entry of users by matching them to their corresponding Employee ID.
